Professor John McNeill  
Principal Investigator  
ASPREE Clinical Trial  
6th Floor Alfred Centre  
99 Commercial Road  
Melbourne, VIC 3004  
Australia

Dear John,

**RE: ASPREE (Aspirin In Reducing Events In The Elderly) Clinical Trial**

Jean Hailes *for Women's Health*, is proud to support the ASPREE Clinical Trial.

Jean Hailes considers this study to be immensely valuable; there is presently very little research undertaken in the area of women's health in the 70+ age group. With around 7% of Australian women aged 70 and over<sup>1</sup>, and an ageing population the need to undertake important research into this area is vital.

We look forward to discovering the research data and findings that will be made available from the strong evidence base of the ASPREE study.

Jean Hailes would be delighted to support ASPREE in the translation, recruitment and retention of research participants for this study.

With very best wishes,

Di McDonald  
CEO  
**Jean Hailes *for Women's Health***
